

## RESTAURANTS

Wherever you go, and especially in the summer, it is recommended that you call and reserve ideally (at least) a day before or during the same day. Places become very busy – so open google maps and look up the restaurants – almost all of them have a phone number and all restaurant speak at least English. For the Praça, there is a reservation desk at the opposite side of Monty's which helps with reservations in the busy summer months.

### Within Vale Do Lobo resort

You have multiple choices for restaurants in the resort and on the door step of the resort (check below). All of them are / can be walking distance if you like to have a stroll before and a digestive walk after 😊

- The Praça hosts the following restaurants: 2 Italians, a Mexican, an Asian, two International, a Fish and a Beach Bar
- The Clubhouse (Spikes) is daily open for breakfast, lunch, snacks and dinner and serves health conscious choices
- A Chinese restaurant (Ken Lo's Memories of China) and the Tennis Café are serving guests at the east part of the resort

### Just outside the Vale Do Lobo resort

There are many (good) restaurants within a few kilometers from the resort and aquamarine. When you come and go from Vale do Lobo to Almancil, you must have notices many restaurants along the way. There are some ordinary and some better ones but generally speaking they are all quite good and probably a bit less expensive than the ones on the resort. There are some good ones on those roads but also some more along the beach and in Quinta do Lago

### In the nearer surroundings

VDL is close to Vilamoura and Albufeira. In both cities (and between), you will find decent restaurants at different price categories. For us, we love to stroll around the harbor in Vilamoura at night and just pick one of the many restaurants there or have a drink or ice cream while watching the yachts and vacationers.

### In the Algarve

The Algarve is a vacation place for Europeans and world travelers. Respectively there are some good restaurants. We have not discovered them all yet but can give some recommendations:
